# Project Estimates

## *in Seconds*

Designed for

OWNERS, DECISION MAKERS, CHIEF EXECUTIVE OFFICER, HIGHER MANAGEMENT

---

# Problem

Managing a Business, especially when managing budgets, mitigating risks, and making crucial decisions, is no easy feat. The long and tiresome computations are like stirring a hornet's net.

---

# Solution

Presenting an effective solution, perhaps first of its kind, A very **NICHE** Software that can significantly reduce the workload of Decision Makers, Chief Executive Officers, Higher Management and automate your process to arrive at the most appropriate Cost Estimate for your project is the need in today's Industrial world.

This is a new software that can help your tedious task to bring and present a reliable and quality cost estimate for your project.

It will generate precise Project Cost Estimates in mere seconds.

# Selecting A Project For Execution

The three major decision-making factors

ESTIMATED COST OF PROJECTS AT A HIGH LEVEL BECOMES THE SINGLE MOST IMPORTANT DECISION-MAKING TOOL DURING THE SELECTION OF THE PROJECTS.

# CURRENT PROCESS IN SELECTING A PROJECT

# THE HURDLE TO GET RESULTS

Requires 2-3 weeks of time period

Money spent in hiring and  
maintaining a full time of cost  
estimators and engineers

Budget during phases: Lacks cost  
distribution in various phases of a  
project identified under major heads

# THE HURDLE TO GET RESULTS

Requires 2-3 weeks of time period

.....➔ Get results in 60 seconds

Money spent in hiring and  
maintaining a full time of cost  
estimators and engineers

.....➔ Cost saved up to 50%

Budget during phases: Lacks cost  
distribution in various phases of a  
project identified under major heads

.....➔ Get cost estimates for major  
phases of your projects with  
major head breakdowns

PROJECT ESTIMATES IN SECONDS

# Challenges faced: QUALITY OF RESULTS

Numbers are only as good as quality  
of engineers and estimators of a  
team

Lacks consistency since prepared by  
different cost estimators and  
engineers

# Challenges faced: QUALITY OF RESULTS

Numbers are only as good as quality  
of engineers and estimators of a  
team

.....➔ Eliminate human error

Lacks consistency since prepared by  
different cost estimators and  
engineers

.....➔ Get results in customizable  
template that stays  
consistent

PROJECT ESTIMATES IN SECONDS

# Project Management: OTHER CONSIDERATIONS

Lack of knowledge on the cost investment for execution of the project (on an overall basis)

Lack of appropriate idea of fund requirements to start a project at any given phase the projects

# Project Management: OTHER CONSIDERATIONS

Lack of knowledge on the cost investment for execution of the project (on an overall basis)

Get Cost Estimate to execute the project

Lack of appropriate idea of fund requirements to start a project at any given phase the projects

Get cost breakdown by phases that is customized to your project

PROJECT ESTIMATES IN SECONDS

# Especially Designed for Management

- You can have your Project Cost Estimate before your coffee is ready to sip
- Cost Per Month of Software Subscription is less than a family dinner at a nice restaurant
- Get the accurate high level / class 5 / Class 4 project cost estimate in seconds
- Right Project Cost Estimate provides best financial results.
- Please do-not Guess Project Cost. Guessing the Project cost is extremely dangerous.

---

# ONE-OF-A-KIND Cost Estimating Solution for the Industries

- Provides Breakdown of Cost Estimates by Project Phases in Major Cost components
- Put one price and software will calculate all the cost breakdown in major cost heads
- Can customize Project Cost Estimate very quick to suit to your project needs.
- Software calculates Project Cost Estimate for Various types of Industries
- Calculates the Project Cost Estimate for Greenfield and Brownfield Projects.
- Least training needed to operate the software.

---

How do you feel about a cost estimating software developed by an Engineer with MBA and 45 years post- graduation experience in various industry across the globe and working experience as Project Cost Estimator, Project Controls Specialist, Project Engineer and CONSTRUCTION ENGINEER?

*Major industries include Oil & Gas, Refineries, Petrochemicals, Chemicals, Pharmaceuticals, LNG / GNL, Infrastructure projects , Civil & Buildings, Conventional Power Plants , Nuclear Power Plants and many more. Value ranges few hundred thousands to \$9 Billion CAD.*
